

GOOGLE 4K STREAMER INSTALL INSTRUCTION

To turn on Developer Mode on a Google 4K Streamer (Chromecast with Google TV), follow these steps:

1. **Navigate to Settings:**

- From the home screen, scroll down and select the **Settings** gear icon.

2. **Go to About:**

- In the Settings menu, scroll down and select **About**.

3. **Find Android TV OS Version:**

- Look for the option that says **Android TV OS Build**.

4. **Enable Developer Options:**

- Click on the **Android TV OS Build** option repeatedly (about 7 times) until you see a message indicating that you are now a developer.

5. **Access Developer Options:**

- Go back to the main Settings menu, and you should now see a new option called **Developer options**.

6. **Turn On Developer Options:**

- Select **Developer options**, and toggle it to turn it on. Here, you can also enable options such as USB debugging or allow installation from unknown sources if needed.

By following these steps, you'll successfully enable Developer Mode on your Google 4K Streamer, allowing you to access advanced features and settings.

PART 2:

To install the Downloader app on your Google 4K Streamer (Chromecast with Google TV), follow these steps:

1. **Open Google Play Store:**

- From the home screen, navigate to the **Apps** section and select **Google Play Store**.

2. **Search for Downloader:**

GOOGLE 4K STREAMER INSTALL INSTRUCTION

- In the Play Store, use the search bar to type in "Downloader" and look for the app by AFTVnews.

3. **Install the App:**

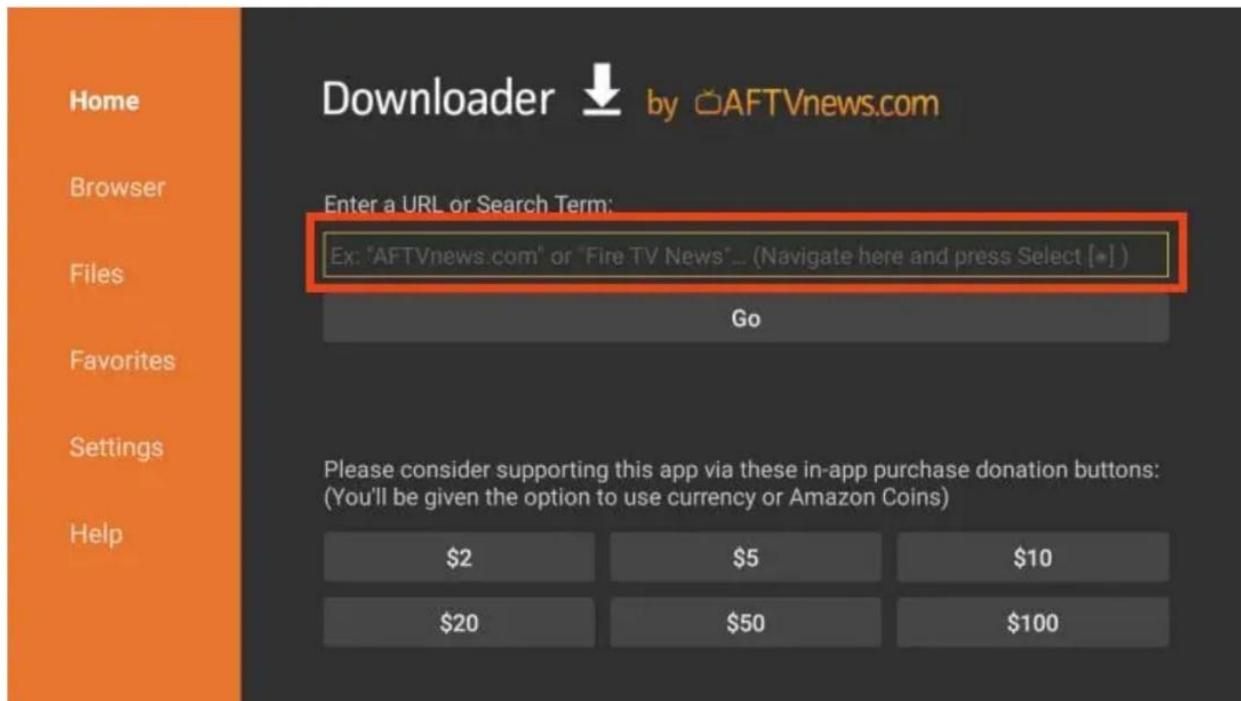

- Select the Downloader app from the search results and click on **Install**.

4. **Open Downloader:**

- Once installed, you can find it in your apps list. Open it to start using it for downloading APK files or other content.

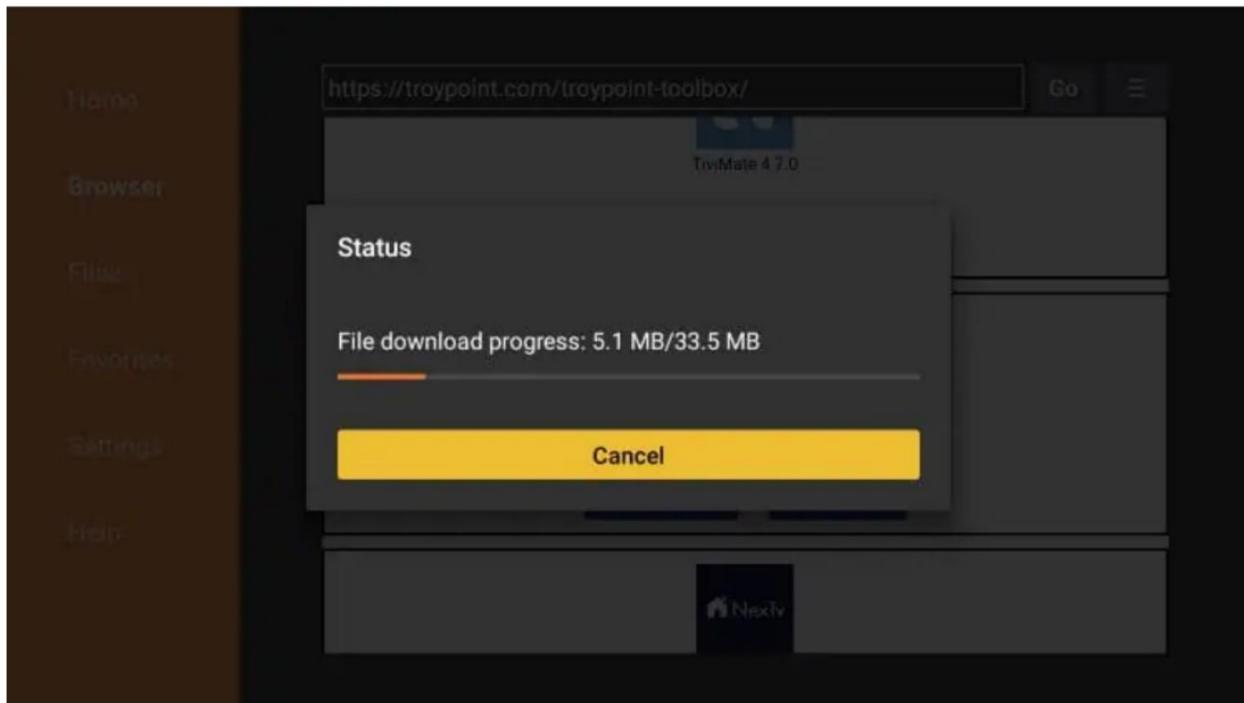

PART 3

- Click the URL box and enter **https://aftv.news/1246622** and click Go.

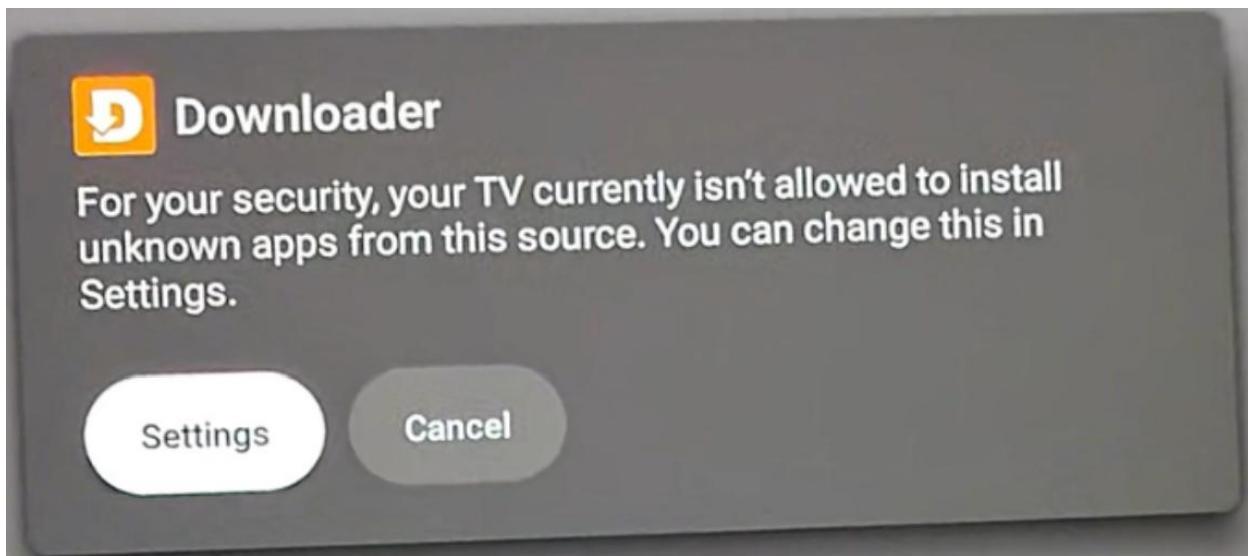

- Wait for the app to download
